PROJECTS

Movify – Movie & TV Discovery App
Technologies: Flutter, Dart, Firebase, BLoC, Clean Architecture
- Independently designed, developed, and published a movie and TV discovery application on Google Play, reaching 500+ installs.
- Implemented offline favorites with local persistence and Google Sign-In synchronization, alongside API response caching using Dio Cache Interceptor.
- Applied Clean Architecture and BLoC/Cubit, using Bloc concurrency utilities and HydratedBloc for state management and persistent user preferences.
- Optimized application performance using Flutter DevTools, and configured CI/CD with GitHub Actions and Fastlane, alongside Shorebird for over-the-air updates.

Personal Developer Portfolio
Technologies: Figma, Jaspr, Dart, HTML, CSS, Vercel
- Designed and developed a responsive personal portfolio using Figma, Jaspr, and Dart, translating UI/UX designs into reusable web components.
- Applied responsive styling, accessibility, SEO, and performance optimization, and deployed the website through Vercel with GitHub integration.
