Rami Mohammed Obaid

Flutter Developer

ramiobbb9@gmail.com +20 101 446 2418 github.com/Rami545432

Summary

Flutter developer with strong hands-on experience building mobile applications using clean architecture and modern state management. Skilled in responsive Ul development, REST API integration, and local data persistence. Focused on writing maintainable, scalable, and production-ready Flutter applications.

Education

Bachelor of Electrical Engineering, *Faculty of Electrical Engineering, Damietta University*
(Graduated).

Skills

- Flutter
- Bloc/Cubit
- REST APIs
- Pagination
- Responsive UI
- Theming
- Git
- Dart
- Clean Architecture
- JSON
- Hive
- Localization
- Firebase Auth

Projects

Movify App, *Full-featured Flutter app built from scratch.*
Production-ready Flutter application built from scratch for discovering and watching movie content within the app. Designed a scalable clean architecture and implemented Bloc/Cubit for predictable state management. Integrated TMDB REST API for rich movie metadata, search, and pagination, and added in-app video streaming and playback functionality. Built responsive UI components with reusable widgets, implemented localization (LTR/RTL) and app-wide theming (light/dark mode), and optimized performance and memory usage. Included an AI-powered assistant to help users discover movies using natural language queries.

Notes App, *Local notes application with full CRUD operations.*
Implemented Hive for local storage and Bloc for state management with a clean, responsive UI.
